Field Study – Longbridge
Nathan Wilson – 06/07/2016

Why bother with a field study?

Site Location

Background
The Site
Methodology
Results
What Next
Initial Sensor Locations
Instrumentation of Weir
Final Sensor Locations
Instrumentation of Transect
Trace Data – Inlet-Outlet

Transect Sketch

Transect Trace Data

Further Traces
Vegetation Analysis
Discharge
Reporting
Fully Instrumented Field Site
Multiple traces with different flow and vegetation conditions
Primary data for CFD validation

What other sensor locations should we investigate?
How can we improve vegetation characterisation?
